

Replacement Parts for your **TRAMPOLINE PARK**

- Quality products, competitive prices
- 30+ years' experience
- UK showroom
- Ongoing support, including safety checks and repairs

AN INTRODUCTION TO SUPER TRAMP

Industry specialists for more than 30 years

Super Tramp was founded in 1983 and is now one of the world's leading manufacturers of commercial trampolines. Our services include:

- Bespoke design, manufacture and installation of trampoline parks
- Supply of competitively-priced spare parts to fit a range of brands
- Ongoing support, including maintenance, safety checks and repairs
- Consultancy service, including one-to-one and group training sessions

Quality products, competitive prices

Inferior parts can lead to accidents and seriously harm a park's reputation. At Super Tramp, every product is designed to meet rigid standards in safety, durability and performance. Parts are manufactured right here in the UK and you'll find our prices very competitive.

Bespoke products for your park

We can manufacture replacement trampoline beds to your specifications. You choose the material, size, thickness, colour and webbing, from a range of options. The beds can even be branded with your logo. Padding and nets are also available in sizes and colours to suit your park. This option may well be more cost-effective than going back to your original supplier, and keeps your park looking at its best.

A UK showroom with a difference

If you'd like to experience the quality of our trampolines for yourself, we'd be happy to show you around our Super Tramp Park in Plymouth. The park includes 24 interconnecting trampolines and two large incline trampolines, along with a dodgeball arena, giant air bag and wall running area. Everything within the park can be ordered and manufactured to your own specification.

Replacement Springs

Our springs are extra strong and extra bouncy. Your customers will love how they perform, and you'll love how long they last.

Tapered Springs

We've perfected our tapered springs over several years. They react to the weight of the individual user. This means that different parts of the spring are put under pressure by different users, vastly increasing the lifespan of the spring and your customers' enjoyment. Our tapered springs also feature an elongated hook, so they're easier for you to fit.

178mm (7 inch) springs: tapered design

216mm (8.5 inch) springs: tapered design

Consistent Width Springs

Our largest spring is designed for performance trampolines. The consistent width means that all of the coils are used at once, allowing users to bounce extra high. This spring is ideal for larger trampolines that feature a 2 string or web bed.

235mm (9.25 inch) performance springs

Replacement Trampoline Beds

We have a range of trampoline beds to suit different needs and budgets. Most are available in a choice of colours, including contrasting webbing, and can be branded with your park's logo.

Polymesh Beds

Our most popular beds, these are very competitively priced and adhere to strict quality and safety standards. The beds come with 200mm spring cover extensions. Single-skin polymesh beds are our most economical solution. However, the stronger double-skin beds are longer-lasting, so offer better value over their life-span and eliminate the need for secondary fail-safe netting.

- Single-skin Tencate polymesh bed with 200mm spring cover extensions. Available in black with the option of a coloured webbing border.
- Double-skin polymesh bed with 200mm spring cover extensions. Available in black, as well as red, blue, grey or yellow over black Tencate, with the option of coloured webbing.

Powermesh Beds

Our powermesh beds offer increased control, making them particularly suitable for younger children and gymnasts. They're actually made from one skin of polymesh and one of powermesh, to offer both superior performance and increased durability. These beds also come with 200mm spring cover extensions.

- Double-skin powermesh bed with 200mm spring cover extensions. Available in a wide choice of colours, including black, grey, green, blue and red, and your choice of coloured webbing.

Coloured Contrast Webbing

The majority of our beds come with a webbing border. The webbing border is available in a choice of colours. We suggest ordering a contrasting colour to the bed, as it can help to reduce your park's injury rates.

The contrasting colour helps children to recognise the safe jumping zone and keep away from the padding when they're jumping. This makes your beds last even longer.

Our 2-string beds don't need the webbing border, so have the jumping zone printed onto them instead.

2-String Performance Beds

Our 2-string bed is exclusive to Super Tramp and believed to be the hardest-wearing trampoline bed available in the UK.

Increased performance

The 2-string bed is similar to a webbed bed, but offers better grip and stability. This helps users to build their confidence, and feel comfortable bouncing higher and performing tricks. The cross-weave design has air pockets between the strings to allow for optimal airflow. This crucial flow of air is the key to the 2-string's exceptional performance, allowing for maximum jump power and uncompromised stability. The 2-string is particularly recommended

for parks that offer trampoline classes, or which have a dedicated performance section.

Webbed beds can stretch over time, which affects their performance and means they need replacing more frequently. The 2-string doesn't have this problem. It maintains its shape, stability and performance, bounce after bounce after bounce.

2-string performance bed:

Available as a 425 x 213cm, 425 x 183cm and 366 x 183cm bed, in a wide range of colours, including standard white, black and yellow*.

*Not available with coloured webbing border.

Exceptional Durability

Our 2-string bed can last six times as long as a webbed bed. What's more, it can be refurbished and repaired by our specialist team, so could last you for many years. All in all, it offers you superb value for money. The 2-string bed is very easily cleaned, whilst our refurbishment service restores the condition of the bed to as though it were new and extinguishes even the toughest of stains.

Wide choice of colours, sizes and branding options

Our 2-string bed is available in black, yellow and white as standard. However, a range of other colours can be ordered on request. The bed can also be branded with your park's logo. Three sizes are available, including a whopping 425 x 213cm option.

Unsure which trampoline bed to choose? Please call us direct on 01884 675 801 so we can recommend the best bed for your park's needs.

Bespoke Frame Pads

We can custom-make padding in a range of colours and sizes, right here in the UK.

Quality materials

We only use commercial standard foam, which is closed-cell and cross-linked for extra durability. Unlike cheaper packaging foam, our padding is designed to maintain its shape, so it offers the same high standard of protection over a longer period of time.

A strong, double-sided PVC coated nylon is used to protect the foam and make the padding easy to clean.

Range of options

All of our pads are manufactured on demand; just let us know the size you need. You'll be offered a wide choice of colours, and can also have your park's logo printed on the padding if you wish. Our standard foam is 50mm, but a range of thicknesses are available on request.

Bespoke Steel Frame Fabrication

Planning to add a new section to your trampoline park? Our team of specialists can undertake bespoke steel fabrication using high-quality UK materials. Our staff are all fully trained and have extensive experience. Your frames will be manufactured in our South West factory, to your unique specifications.

Non-cling netting

Our non-cling netting is strong and durable, and made to the latest IATP specifications. The netting can help you to protect both bouncers and onlookers. It's designed to withstand the most competitive of dodge ball games! A huge range of colours are available, and the netting will be supplied to your exact measurements.

Training and Support Services

Super Tramp is more than just a supplier. We aim to build lasting relationships with our clients and can offer a wide range of support services. We can also carry out staff training, to ensure that your team members can undertake basic maintenance, repairs and safety checks. Please contact us for more information.

SUPER TRAMP

Part of the Family

Whether you need a couple of replacement springs, or a whole new park, Super Tramp is here to help.

Products

- Trampoline beds in a range of materials, sizes and colours
