

FRAME PAD ELEVATOR KIT

USER GUIDE

Adult assembly required

Read User Guide before assembling

Please keep this guide for further reference

SAFETY INFORMATION:

Conforms to standard EN12195/2

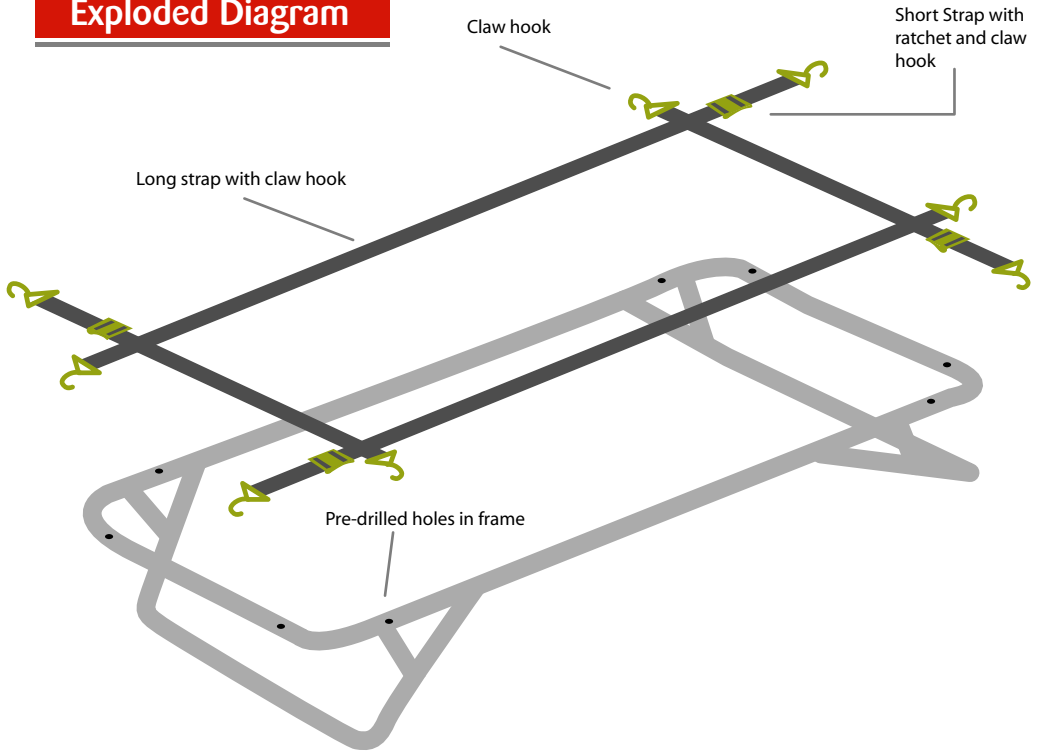

Material: POLYESTER

For trampoline use only. **NEVER TO BE USED FOR LIFTING.**

Part of the Family - Est 1983

Exploded Diagram

Frame Pad Elevator Kit

Parts List

- 4 x ratchets with attached strap and claw hook (Part A)
- 4 x long straps with claw hook (Part B)

STEP

1

Locate **parts A** and fix the hooked ends into the pre drilled holes shown in the diagram on the right.

At both ends of the trampoline frame, a ratchet should be attached on a side rail and an end rail at opposite sides of the frame

STEP

2

For each ratchet strap, loop the strap under and back over the hooked end as shown in image to the right.

STEP

3

Take **part B** and allocate the hooked end to the designated hole at the opposite end of the trampoline to the ratchet.

Wind the strap under the rail and back over the hook in the same way you did the ratchet strap.

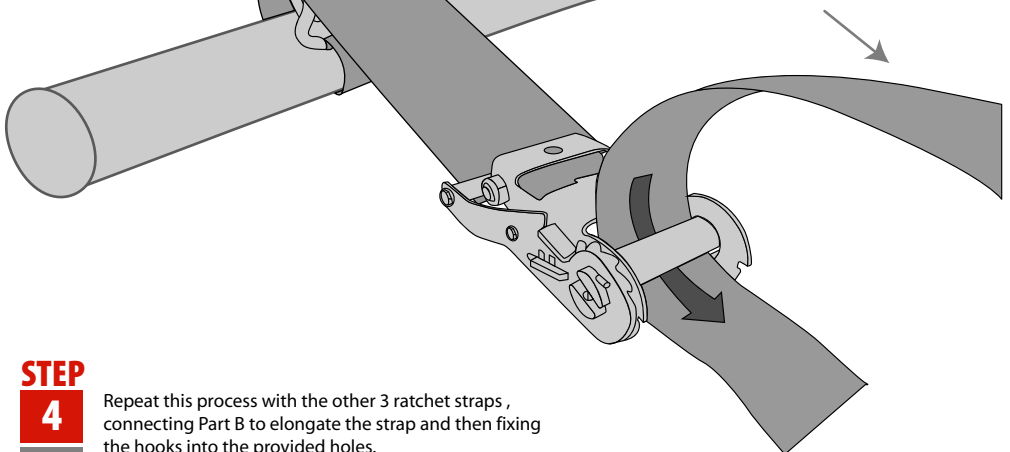

Take **part B** and thread the material end through the narrow gap between the ratchet.

Part A

Part B

STEP

4

Repeat this process with the other 3 ratchet straps , connecting Part B to elongate the strap and then fixing the hooks into the provided holes.

PTO..

STEP

5

The diagram below shows what one of the corners should look like.

STEP

6

Take up the slack in the ratchet straps but **do not** tension at this stage.

STEP

7

Fit the frame pads as described on the next page.

STEP

8

Finally, working from underneath the frame, use the ratchet lever to tension the straps by manoeuvring it up and down. When the frame pads are elevated above the springs by approx. 1cm, you have completed fitting your Elevator Kit.
